The Evidence Based Library and Information Practice Conference (EBLIP4) is an exciting international event that has emerged in response to the growing interest among all types of libraries in using the best available research-based evidence to improve information practice. The conference on May 6-9, 2007 in Chapel Hill, North Carolina will be followed by two days of CE. The conference provides a forum for the presentation of high quality papers and posters as well as examples of how EBLIP is being implemented in library and information settings around the globe. EBLIP4 invites submissions for contributed papers and posters including both original research and innovative applications of EBLIP in library and information management. Papers that deal with library support of evidence-based practice in other fields such as health, social work and public policy are also welcome. Additional info may be found at www.eblip4.unc.edu

Important Dates

January 8, 2006

Submission deadline for abstracts for papers and posters
